

## Points forts

1. Built en Brushless Motors
- 2,5 pouces ou 6 pouces Hélice
- verres 3. Panasonic Six couches optiques, lentilles 1080P HD
- Protection rotor du moteur 4. Locked
5. 30C décharge à haute vitesse, une énorme énergie

## Caractéristiques

Modèle: FALCON

Matériel: Engineering Plastics

Voler Poids: 580g

Batterie: 11.1V 30C 1300mAh 3S Lipo

batterie de contrôleur: 4 \* 1.5V "AA" (non compris)

Temps de vol: 10-15minutes

Limite d'âge: > 14 ans

Moteur: 2204 moteur Brushless KV2300

Plage de transmission: environ 500-1000 mètres

Temps de charge: 1,5 h

Channel Control: 6 canaux

Vitesse maximale: 72 kmh

Taille du paquet: 310 \* 266 \* 196mm

Fonction: haut / bas, avant / arrière, gauche / droite, vol leftward / vol la droite, Flips & rouleaux

## Le contenu de la boîte

1 x RTF [Quadcopter](#)

1 x émetteur mode 2 Tovsto

Batterie 1 x 11.1V 1300mAh LiPo

1 x chargeur LiPo et l'adaptateur secteur

# GEEK RISING

There are a crowd of people  
They are with very high IQ, but hate mainstream life  
They are always like to try fresh new things, but never follow blindly  
They are crazy about all kinds of technology, and always in dominant position.  
The love network, games, films and love thoes things most people can not  
master, they are Geek.

# GEEK GLORY

Dubai princess invested about a hundred million  
to make world famous race drone racing to let  
World's race drone Geek to go after the 1 million awards.  
Geeks are not home men and home women, they are not the game fever  
They are using their own methods to build their own honor

Strong brushless  
motors

FPV fly

Roll and up flight

Top Speed  
72km/h

Sony 6 layer lens

6 axis gyroscope

Intelligent wifi module

SD card storage

5.8G transmission

600-1000m  
remote control  
distance

720P resolution

# TOVSTO FALCON

Race drone  
Fast flight, no limit  
Win your own Geek honor

Photograph is out, now more and  
**more people**  
like to play with race drone

**Play compete Play racing Play skills**  
Small drone with big wonder

## Brushless motor

Locked rotor protection function  
Propeller in high speed operation, there is a sudden stop  
by the external force  
Protect the motor and the circuit are not burned

According to different colors and the lights of camera,  
we set front LED as white lights,  
set the two sides of rear LED as red lights,  
middle lights of the rear LED as green lights,  
it is very fast to differentiate the front and rear

## Front and rear LED design
