

Highlights

4-CH 360° flips 2.4GHz [RC quadcopter](#) headless mode

Left hand throttle and ready to fly

2.4GHz Radio Control

2.4GHz technology adopted for anti-interference, even more than one quadcopter are flying at the same time, they will not interfere with each other

Headless Mode

In headless mode, no matter where the nose is, the quadcopter will flying forward to the positive direction pointed by the nose with power as pushing forward the direction stick, and the other three directions are the same as this

Built-in 6-axis Gyro System & 360° Flips

6-axis gyro quad-rotorcraft flight, strong stability, can easily implement various flight movements, stronger wind resistance, easier to control.

This 4-channel quadcopter can go forward, backward, up, down, turn left, right and left/right sideways fly and 360°flips

Durable Protective Covers & High Intensity LEDs

Build in 4 protective covers, which are durable and can protect blades from breaking, is suitable for beginners; Each side of quadcopter there are some high intensity LED indicators which are used to help you to see the orientation during flight

Specifications

Transmitter Remote Type: Radio Control

Remote Control Frequency: 2.4GHz

Remote Control Range: 30m

Channel: 4 Channels

Function: Forward, Backward, Up, Down, Left, Right, Left/Right Sideways Fly, 360°Flips

Flight Time: About 6 mins

Charging Time: Approx. 50 mins

Battery: Non-removable 3.7V 300mAh lithium battery (Included)

Transmitter Battery: 4 x AA 1.5V batteries (Not Included)

Quadcopter Material: Plastic

Suitable Age: 14+

Size: 125.00*125.00*36.00 mm

Weight: 555.00g

Note: We provide different colors for your choice

Package Content

1 x [Quadcopter](#)

1 x packing box

4 x Spare Blades

1 x USB

1 x Chinese & English User Manual
