

Strengths

4 channels with 3 adjustable speeds with LED light

Built in 6-axis gyro stable fly and easy control

Ascent / descent, forward / backward, turn left / right, hover, fly left side / right side fly, flying throw with 3.0M pixel camera that can both take photos and videos Compatible

Connect with WIFI and search for "CX-WIFIUFO" in "App Store", then download and use easily

R / C Distance: 30m, wireless image transmission distance: 20m

The files of pictures and videos are stored directly in the mobile so you can see the effects when and where; SD card is not necessary practice that brings pleasure and above movie for you

Take WIFI timely transmission; having two control in ways that can not only use the mobile iPhone directly to monitor, but also directly use the transmitter to control the product.

characteristics

Flight Control: remote control

Throttle Side: Left Hand Throttle

Point Size: 18.2x 18.2x 3.7cm

Packing size: 35x 20x11cm

Weight: 71g

White color

Remote Frequency: 2.4 GHz

The battery body capacity: 3.7V 700MAH

Charging method: by the loader

Charging mode: Switching Power Supply

Charging time: 90 minutes

Action time: 5-6 minutes

Remote Control Battery: 4 * AA dry cells

Remote Distance: 30m

Flight altitude: 30m

Features: 4 CH machines, 2 speed, high speed, up, down, forward, backward, turn left, turn right, hovering over the left side of the fly, fly, on hand right, the function bearing, with light, with battery protection

Characteristics

A key Go Home, Mount Camera Included for HD camera (not included)

Failsafe & amp; amp; Auto Go Home & amp; amp; amp; Landing, two flight control modes

Certificates: CE / RoHS / FCC

Package Contents

1 x quadcopter

1 X controller

1 x USB

2 x fan blades

1 x screwdriver

1 x instruction
