

## Highlights

2MP HD Camera adopted for taking photos and videos.

Built-in professional ESC gimbal can be adjusted by transmitter and provides camera spinning from 0° to 90°.

2 Control Modes, entry-level mode helps beginners easily control the quadcopter and technical-level mode gives senior players more freedom to show their techniques.

3 Speed Modes provided for different players.

High intensity metallic material shows powerful anti-collision performance.

Headless Mode makes it no need to adjust the position of aircraft before flying .

One Key Return makes it easily find the way home.

LCD display on the transmitter displays remote control battery capacity, the strength of the transmitted signal, the quadcopter's flight parameters, helping players control the quadcopter.

Function:up/down, left/right sideward flight, forward/backward, turn left/right, rolling 360°, Headless Mode, One Key Return

## Specifications

Item name: RC Quadcopter

Frequency: 2.4G

Gyro: 6 axis

Product size: 55.7\*53.8\*17.5 cm

Package size: 63\*46\*10.5 cm

Quadcopter weight: about 300g

Product battery: 7.4V 2000mAh(Included)

Remote battery: 4 x AA dry battery(not included)

Charging time: 200 mins

Flying time: 11 mins

R/C distance: about 300 m

Color: yellow, blue, red.

## Package Content

1 x FPV RC Quadcopter

1 x Transmitter

4 x Protection cover

4 x Spare propellers

1 x Screw driver

1 x USB charger

1 x Manual

**K70**
