

Highlights

1. Newly-increased Headless Function

Can recall the aircraft easily and One Key Return can make the quadcopter easier to control.

2. 7.4v 1200mAh Battery

Greater battery capacity, longer flying time

3. FPV Real-time Transmission

It can be installed with FPV aerial components: a C4005 /C4008/C4009 FPV aerial component (buy separately, sold in our store) which

can download MJX R/C FPV Aerial software allows real-time camera and video transmission of aircraft during flying.

4. Left/Right Throttle Control Switch Mode

Have 4 play modes for selection. It is simple and convenient to complete mode switch among the 4 modes.

5. Throttle Limit Mode

which designed for protecting the safety of beginners.

6. With 2.4GHz Spread Spectrum Technology

For further enhance aircraft remote control distance, strong anti-jamming capability,

less power consumption, and can control different quadcopters at the same time without interfere with each other .

What important is that it will reaction velocity response 100 times faster than other radio control.

7. With the Newest 6 Axis Stabilization System

For precise hovering in the sky and 360° 3D eversion . It makes the helicopter easier to control,

easily implement various flight movements, strong stability and stronger wind resistance.

8. With LED Light

Not only makes night flight much easier, but also makes the quadcopter look more attractive

9. 3 D Roll and One Key Return

Specifications

Brand name: MJX

Item name: X101 6-Axis Gyro RC Quadcopter

Motor Type: Coreless Motor

Transmitter: GR-246 R / C

Battery: 7.4V 1200mAh Li-polymer

Gross Weight: about 420g

Fuselage Length: 21cm

Battery: 7.4V 1200mAh LI-poly

Controller: 3x1.5V "AA" (Not included)

Charge time: Approx 150 Mins

Use time: Approx 10 min

Control distance: Approx 200M

Feature: Up / down, left / right, forward / backward, Leftward flight / Rightward flight, Light, Flips & rolls

Package Content

1 x MJX X101 Explorers Quadcopter

1 x Transmitter (Remote Control)

4 x Protecting Frames

8x Main Blades

1x 7.4V 1200mAh Li-poly Battery

2 x Landing Skids

- 1 x Screwdriver
- 1x AC Charger
- 1 x User Manual
