

Highlights

1. High Speed Shifting: The remote controller has two-gear shifting modes. The speed can be shifted between low and high. So it is suitable for green hand and professionals.
2. It is equipped with 2.4G remote control technique, 3D flipping special skill, six-axe gyroscope system and headless mode, etc..
3. Headless Mode: You do not need to figure out the direction of the quadcopter in headless mode. It can automatically work out the direction of the remote controller after it is shifted to the headless mode.
4. 3D Flipping: It can finish various difficult actions, such as up and down flipping, forward and afterward flipping, left and right flipping, 360°flipping, etc..
5. Sensitive 2.4GHz Frequency-amplifying Technique: Its reaction is quicker with the 2.4GHz high-frequency signal. The safe remote control distance can reach 100m.
6. Excellent anti-interference Performance: It supports the playing of multiple quadcopters with the interference of each other.
7. Six-axe Gyroscope Controlling System: The inbuilt six-axe gyroscope system guarantees the balance and stability of the quadcopter. The stable flying and hovering makes the quadcopter can better taking photos or recoding videos in flying.
8. More Attractive in Night: Four LED lights are equipped at the bottom of the quadcopter. So it is more attractive when it is flying in night.
9. Two Remote Controlling Manners: Remote controlling and controlling with APP are optional at your reference.

Specifications

Product Name: 2.4G quadcopter

Product Size: 31.5x31.5x10.5cm

Package: carton box

Color Box Size: 53x9.5x30.5cm

Colors: white, black

Quadcopter Battery: 3.7V 550MAh Li-poly

Remote Controller Battery: 5*AA batteries(not included)

Charging Manner: USB

Charging Time: about 60min.

Flying Time: about 6.5min.

Remote Control Distance: about 70m

Functions: rising, landing down, forward, backward, left turning, right turning, 360° flipping, leftward flying, rightward flying, headless mode, photo taking, video recording

Suitable Group: above 14 years

Material: eco-friendly plastics and electronics parts

Package Content

1*[quadcopter](#)

1*remote controller

4*anti-shock frame

1*screwdriver

2* spared fans

1* USB cable

4*landing mounts

1*user manual
