

## Highlights

- \* Mini Style

Product with novel looks,smallest appearance,easy to control and very suit for beginners.  
It will enhance the operating ability of your kids.

- \* Newest 6 Axis Stabilization System

With the newest 6 axis stabilization system for precise hovering in the sky and 360' 3D eversion function and easier to control,  
easily implement various flight movements, strong stability and stronger wind resistance.

- \* 2.4GHz Spread Spectrum Technology

Further enhance aircraft remote contrll distance,strong anti-jamming capability,less power consumption, reaction velocity response 100 times faster than other radio control.

- \* Modular Design Structure

Modular design structure is applied,more simple for assembly and convenient for maintenance, stronger wind resistance,

- \* LED lights

Built-in LED lights can help to indicate direction at night or in dark places,  
and also increase the visual perception of flight.ight.

## Specifications

\*Color: White/Orange. As shown in the picture.

\*Material: (Body) ABS

(Propeller Blade) Nylon

\*Item size: 4.5\*4.5\*2cm

\*Packing size: 9.7\*9.7\*19.2cm

\*Flight Time: Great than or equal to 4 min

\*Charging time: Approx.20-30 minutes

\*Remote control distance: 20-30M

\*Configuration frequency: 2.4GHZ remote transmitter

\*Function: Forward/Backward/Left/Right side-fly, take-off and land, Turn left and right,360° flips with one touch; Headless mode,Quick Stablization with Visible Trimming System

\*Suitable ages: Above 14 Years old

## Package Content

1 \* FX-2 Quadcopter

1 \* Remote Controller

1 \* USB Cable

1 \* Screwdriver

2 \* Propeller Blade A

2 \* Propeller Blade B

1 \* Product Manual
