i Drone

i6s 39g

Extraordinary stability

The i Drone is the most high-end, high-tech, and stable six axis drone. It is also the first of its kind to be built to such a small size that allows you to fly freely indoors.

A new way to capture the moment and the happiness around us

The power of the camera on the i Drone will not disappoint you!

Remote control user guideline

NEVER GET LOST

Compass mode fused with the "one button to return" orientation mode will allow you to control the i Drone to fly safely to places even beyond your vision and return with a press of a button.

Compass mode and "one button to return" mode requires user to point the intended direction of flight first before turning on the i Drone.
