PLUG-IN MODULAR DESIGN

CAMERA MODULE

The module provides you with great FPV.

BATTERY MODULE

The battery has a capacity of 650mAh, makes your flight last for 7 minutes.

MODULE

It protects your drone from crashing into other things.

Note: except battery module, any other add-on is not included.

HOW IT WORKS

Press the button to mount / dismount the battery module.

Press the button to mount / dismount the camera module.

The angle of the camera lens can be adjusted via the transmitter.

OBSTACLE AVOIDANCE MODULE

Omnidirectional obstacle avoidance sensor

If there is any obstacle within 50 - 80cm, the drone will stop approaching and fly back.

Therefore, the obstacle avoidance module serves as a protection for both the drone itself and the people nearby.

CLEVER CUSTOMIZATION METHOD

Have an awesome flight by complementing your drone with some add-on accessories, such as camera module, obstacle avoidance module, FPV monitor and even VR glasses.

Note: the VR glasses are not included.

USER-FRIENDLY CONTROL

Many special functions can be activated by the transmitter, including one key to return / land / take off, headless mode and etc.

PRODUCT DETAILS

1. Flashing LED

Soft flashing LED for better visibility

2. Reinforced Structure

Robust and flexible central body with reinforced arms

3. Flexible Propellers

They lock automatically in the event of collision

4. Modular Design

It greatly increases the ease of maintenance

FEATURES

HIGH PERFORMANCE ROTOR

Enforced with the new carbon fiber compound material, the 13.5 inch quick release rotors work with amazing stability.

EASY TO REPLACE MOTOR

You just need to take off 3 screws to replace a motor.

SHOCKPROOF RUBBER GEAR PAD

The landing pads help to reduce the shock when the drone touches the ground.

AESTHETIC PUSH BUTTON

It looks much cooler than common switches, and goes well with the overall appearance of the quadcopter.
