

Mette in risalto

1. Built-in motori brushless
- 2,5 pollici o 6 pollici Elica
3. Panasonic vetri ottici a sei strati, lenti 1080P HD
4. Protezione rotore Locked per il motore
5. 30C scarica ad alta frequenza, enorme energia

specifiche tecniche

Modello: FALCON

Materiale: Tecnologia delle materie plastiche

Peso di volo: 580g

Batteria: 11.1V 30C 1300mAh 3S Lipo

batteria del regolatore: 4 * 1.5V "AA" (non incluso)

Tempo di volo: 10-15 minuti

Limite di età: > 14 anni

Motore: 2204 motore Brushless KV2300

Gamma di trasmissione: circa 500-1000 metri

Tempo di ricarica: 1,5 h

Controllo Canale: 6 Canale

Velocità massima: 72 chilometri all'ora

Formato del pacchetto: 310 * 266 * 196 millimetri

Funzione: su / giù, avanti / indietro, sinistra / destra, a sinistra volo / volo verso destra, lancia & rotoli

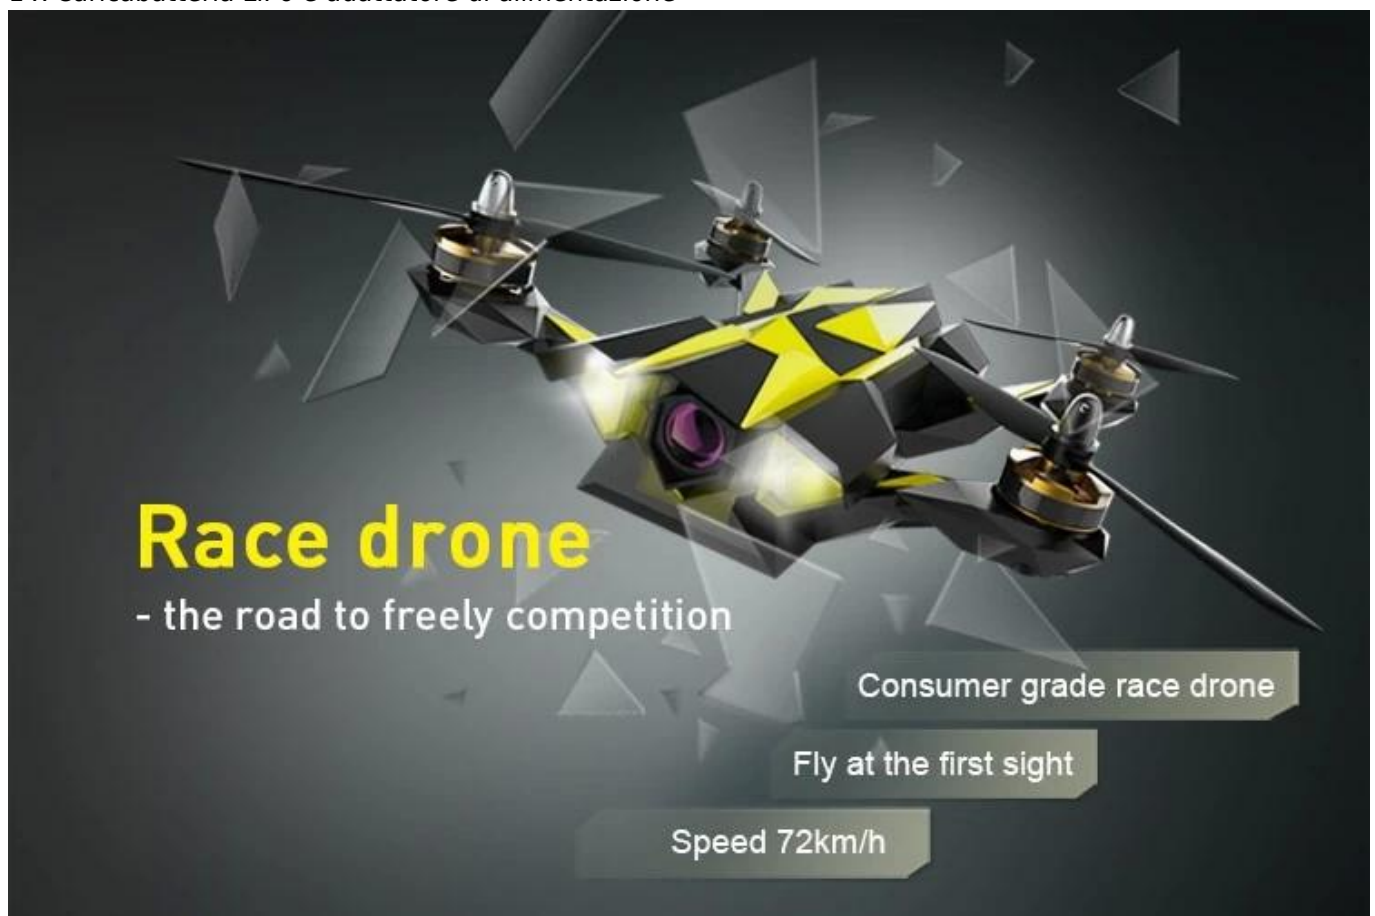

Contenuto del pacco

1 x RTF [Quadcopter](#)

1 x trasmettitore Modalità 2 Tovsto

1 x 11.1V 1300mAH LiPo Batteria

1 x Caricabatteria LiPo e adattatore di alimentazione

GEEK RISING

There are a crowd of people
They are with very high IQ, but hate mainstream life
They are always like to try fresh new things, but never follow blindly
They are crazy about all kinds of technology, and always in dominant position.
The love network, games, films and love thoes things most people can not
master, they are Geek.

GEEK GLORY

Dubai princess invested about a hundred million
to make world famous race drone racing to let
World's race drone Geek to go after the 1 million awards.
Geeks are not home men and home women, they are not the game fever
They are using their own methods to build their own honor

Strong brushless
motors

FPV fly

Roll and up flight

Top Speed
72km/h

Sony 6 layer lens

6 axis gyroscope

Intelligent wifi module

SD card storage

5.8G transmission

600-1000m
remote control
distance

720P resolution

TOVSTO FALCON

Race drone
Fast flight, no limit
Win your own Geek honor

Photograph is out, now more and
more people
like to play with race drone

Play compete Play racing Play skills
Small drone with big wonder

Brushless motor

Locked rotor protection function
Propeller in high speed operation, there is a sudden stop
by the external force
Protect the motor and the circuit are not burned

According to different colors and the lights of camera,
we set front LED as white lights,
set the two sides of rear LED as red lights,
middle lights of the rear LED as green lights,
it is very fast to differentiate the front and rear

Front and rear LED design
