

Speed 72km/h

GEEK RISING

There are a crowd of people
They are with very high IQ, but hate mainstream life
They are always like to try fresh new things, but never follow blindly
They are crazy about all kinds of technology, and always in dominant position.
The love network, games, films and love those things most people can not
master, they are Geek.

GEEK GLORY

Dubai princess invested about a hundred million
to make world famous race drone racing to let
World's race drone Geek to go after the 1 million awards.
Geeks are not home men and home women, they are not the game fever
They are using their own methods to build their own honor

Strong brushless
motors

FPV fly

Roll and up flight

Top Speed
72km/h

Sony 6 layer lens

6 axis gyroscope

Intelligent wifi module

SD card storage

5.8G transmission

600-1000m
remote control
distance

720P resolution

TOVSTO FALCON

Race drone

Fast flight, no limit

Win your own Geek honor

Photograph is out, now more and
more people
like to play with race drone

Play compete Play racing Play skills
Small drone with big wonder

Brushless motor

Locked rotor protection function
Propeller in high speed operation, there is a sudden stop
by the external force
Protect the motor and the circuit are not burned

According to different colors and the lights of camera,
we set front LED as white lights,
set the two sides of rear LED as red lights,
middle lights of the rear LED as green lights,
it is very fast to differentiate the front and rear

Front and
rear LED design
