

## Highlights

Patent appearance, distinctive, anti-crash, protocol compatible with FUTABA, S-FHSS

Delicate body design is very convenient for taking and maintenance.

3D 6G mode can be converted easily

3D lock mode is to improve posture and increase stability. Even primary level can fly it as an expert. 6G mode keep stabilization, which keep the airplane stable flying pose when you loosen the transmitter in any case.

Hang FPV (not included)

It can hand FPV to make you enjoy beautiful landscape during flying.

3D aerobatic flight

Bi-directional brushless motor and quick response ESC can help you to do extreme 3D aerobatic flights.

Integrated molding, only 770g

PC+ABS material and integrated molding tech make it smooth appearance and impact resistance

Specialized transmitter, much safer and reliable

With 2.4Ghz communication technology to make 1000m control distance and no interference by any other transmitters during fly.

High efficient brushless motor

2212 1400KV brushless motor provides strong power.

High discharge rate battery

X350 is equipped with 11.1V 2200mAh high discharge rate battery, powered flight time is about 10mins, normal flight time is more than 15 mins.

Special balance charger

Li-po special balance charger and adapter charging time is 1.5-2 hours.

## Specifications

Item Name: RC [Quadcopter](#)

Channel: 4CH

Gyro: 6 Axis Gyro

Material: Special PC+ABS

Wheelbase: 37.6cm

Flying Time: More Than 12-18 minutes

Motor: 2212 1400/KV Brushless Main Motor

Battery: 11.1V 2200mAh 40C Li-po Battery

Recharging Time: 1.5-2 hours

Remote Control Mode: 2.4G

Remote Control Distance: 1000 Meters

Flying Weight: 770g

Product Size: 305 x 305 x 210mm

## Package Content

1x RC [Quadcopter](#)

1x Remote Control

1x Charger

4x Blade

1x Lithium Battery

1x Boxed

1x Manual

# X350
