

Highlights

720 x 1280 camera adopted for real-time image transmission and taking pictures.

5.8G 32CH transmitter can realize automatic search frequency.

FPV monitor adopts snowflakes screen and built-in OSD (the flight voltage of battery, current channel).

Ultrafast flight speed easily manipulated.

Mode 1(right hand throttle) and mode 2(left hand throttle) are available.

Steady rise mode and manual mode are optional.

Carbon fiber, super anti-fall structure.

Easy disassembly quick change propeller device.

Long distance remote control high sensitivity.

Powerful performance in obstacle avoidance.

Specifications

Color: black

Frequency: 5.8G

Channel: 32 CH

Flying time: 12mins

Product battery: 11.1V 1600mAh Lithium battery (Included)

Remote battery: 4 x AA dry battery (Not included)

R/C distance: about 500 m

Quadcopter size: 31*31*12cm

Quadcopter weight: about 420g(with battery)

Length of main rotor: 120 mm

Brushless motor: 1806

Brushless ESC: 4 in 1 brushless ESC 18A

Working environment temperature: -10°C to +40°C

Function:up/down, left/right sideward flight, forward/backward, turn left/right, rolling 360°

Package Content

1 x Jumper [FPV Quadcopter](#)

1 x 11.1V 1600mAh 35C 3S battery

1 x 5.8G antenna

1 x Cheerson CX-91 5.8G Transmitter

1 x 4.3 inch 5.8G 32CH Monitor

1 x monitor holder

1 x mushroom antenna

8 x black propeller

1 x balance charger

1 x Screw driver

1 x Wrench for assemble/ disassemble propellers

1 x Memory card set

1 x Data transmission cable

1 x Manual
