

## Highlights

- 1.This is a 5.8G FPV and WiFi FPV remote control quadcopter with a 720P camera. You can control it directly or connect it with APP or APK system to record happy memories and take photos freely.
  - 2.With attractive headless mode, completely solving pilot "loss of orientation" problems.
  - 3.Air press altitude hold makes your quadcopter special.
  - 4.One press automatic return and one press automatic take off and landing provides a convenient control for you.
  - 5.With three modes of speed, which is low, medium, high speed for each mode, enjoy your flight velocity as you want.
  - 6.With 360 degrees rotation and flip, professional cool and exquisite flight action.
  - 7.2.4GHz transmitter power ensures the strong anti-jamming capability.
- With colorful light, creates a interesting flight at night.

## Specifications

Type: Quadcopter

Features: 5.8G FPV,Air Press Altitude Hold,Controlled By Phone and Transmitter,WiFi FPV

Functions: 360 degrees spin,Air Press Altitude Hold,Forward/backward,FPV,Headless Mode,One Key Automatic Return,One Key Landing,One Key Taking Off,Turn left/right,Up/down,WiFi Connection,With light Built-in Gyro: 6 Axis Gyro

Night Flight: Yes

Material: Electronic Components,Plastic

Level: Beginner Level

Remote Control: 2.4GHz Wireless Remote Control,WiFi Remote Control

Channel: 4-Channels

Mode: Mode 2 (Left Hand Throttle)

Detailed Control Distance: 50m

Transmitter Power: 4 x AAA battery (not included)

Model Power: 1 x Lithium battery(included)

Battery: 3.7V 520mAh

Flying Time: 6mins

Charging Time : 70mins

Camera Pixels: 720P

## Package Content

1 x [Quadcopter](#)

1 x Transmitter

1 x LCD Screen

1 x Screwdriver

1 x Battery

4 x Blade

1 x USB Cable

1 x English Manual

## SPECIAL ROLLING

WITH A 360-DEGREE ROLL FUNCTION, IN FRONT, LEFT  
DIFFERENT DIRECTIONS TUMBLING, TUMBLING SPEED SENSITIVE
